**Subject:** N. Tongass Structures 2003-2010

Steve,  
Howdy.

Here is the data from our zoning records.

									Total
Year	2010	2009	2008	2007	2006	2005	2004	2003	
New Structures/dwellings	10	15	19	24	24	18	28	31	169

This is for all new buildings and structures, and includes any increases in dwellings (converting from SFD to Duplex etc).

I tried to exclude any non-structural's like decks or interior remodels etc. This does include new garages, shops and detached accessory dwellings.

Of course, this only reflects the zoning permits applied for. We don't have good information on what was actually built or not.

This is conservative since we don't know what was built or expanded without permits. So the actual number is likely higher.

Let me know if you have questions or need more info.

Best Regards,

Mark Jaqua, Associate Planner
